EDUCATION

Thapar Institute of Engineering and Technology

Bachelor Of Engineering in Computer Science and Engineering

Patiala, Punjab

09/2022 - Ongoing

- **Cumulative GPA :** 8.61/10.0

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Conversational Artificial Intelligence, Natural Language Processing

Delhi Public School, R.K. Puram | CBSE

New Delhi, Delhi

03/2018 - 06/2022

- **XII Percentage:** 96.4%

- **X Percentage:** 97.8%

PROJECTS

AI-Driven Image & Speech Processing Web App | Python (Tensorflow, Keras, OpenCV)

- Developed an AI-powered web application for image and speech processing, deployed using gradio.
- Integrated image classification with a Convolutional Neural Network (CNN), OCR-based text extraction using Tesseract, image's text enhancement with OpenCV, text-to-speech conversion and speech-to-text conversion.

USA Accidents Data Analysis | Python (Pandas, Mathplotlib, Scikit-learn)

- Led a team of 3 to develop an intuitive platform for users to explore over 4 years of US accidents' data.
- Visualized data with Seaborn and Matplotlib, creating 5+ interactive charts and graphs for exploring trends across 200+ towns.
- Optimized data retrieval and loading times, allowing users to interact with large datasets in under 2 seconds.

Pokemon Search Website | JavaScript, HTML, CSS

- Directed the design and implementation of dynamic search functionality using an external API for 800+ Pokemons.
- Developed an interactive user interface for real-time Pokemon searches, improving search response time by 30 seconds on average and enhancing overall user engagement based on collected feedback from 250 users.
- Achieved 100% responsiveness across mobile, tablet, and desktop devices, ensuring compatibility with all screen sizes.

Automated Parking Allocation and Monitoring System | Python, MySQL

- Guided team in designing and maintaining a tracking system for parking availability, enhancing system efficiency by 50%.
- Automated vehicle check-in/check-out process, handling 100+ vehicles per day with real-time parking slot allocation.
- Managed a database with 500+ parking slots, tracking availability, vehicle details, and user information.
- Simplified parking operations, providing real-time updates on parking space availability, reducing manual work by 80%.

SKILLS

Languages: Python, C/C++, JavaScript, Java, Frontend (HTML, CSS), SQL

Tools/Software: Version control (Git and GitHub), R, MATLAB, Excel

Libraries/Frameworks: React.js, Pandas, Scikit-learn, TensorFlow, PyTorch

CERTIFICATIONS

Accelerating End-to-End Data Science Workflows

NVIDIA

- Acquired expertise in NVIDIA RAPIDS, cuDF, cuML, and cuGraph for accelerated data processing and machine learning.
- Worked on real-world use cases and the BioDefence project to solidify understanding of GPU-accelerated workflows.

Machine Learning with Python

freeCodeCamp

- Applied machine learning algorithms, including K-Nearest Neighbors (KNN), Deep Neural Networks (DNN) using TensorFlow, and Regression models, to analyze datasets and develop solutions to complex problems.

Data Analysis with Python

freeCodeCamp

- Performed data cleaning, manipulation, and visualization to derive insights from large datasets.

Responsive Web Design

freeCodeCamp

- Gained proficiency in HTML5, CSS3, and web accessibility best practices by creating over 5 webpages.

ACHIEVEMENTS

- Awarded scholarship worth Rs 415800 in Ist year for academic success.
- Scholar Badge Holder for 10 consecutive years in school.

OTHERS

- **Languages:** English, Hindi
- **Core Member** at SPICMACAY society
